FINAL DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 22-26 have been renumbered claims 21-25. *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

3. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

4. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 4-7, 10-12, 14-20, and 22-26 rejected on the ground of nonstatutory double patenting over claims 1-11 of U. S. Patent No. 6,738,888 by Chauvel, claims 1-13 of U.S. Patent No. 6,751,706 by Chauvel et al, claims 1-14 of U.S. Patent No. 6,889,330 by Chauvel et al, and

claims 1-12 of U.S. Patent No. 6,901,521 by Chauvel et al since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patents.

The subject matter claimed in the instant application is the same as the subject matter of a processing device for multitasking multiple tasks claimed in the '888 patent, the '706 patent, the '330 patent, and the '521 patent. Claims 1-11 of the '888 patent, claims 1-13 of the '706 patent, claims 1-14 of the '330 patent, and claims 1-12 of the '521 also pertain to the same subject matter as the pending claims in the instant application.

6. Claims 1, 4-7, 10-12, 14-20, and 22-26 are provisionally rejected on the ground of nonstatutory double patenting over claims 1-15 of copending Application No. 09/932,361. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The disclosure and the pending claims of the referenced copending application and the instant application are claiming common subject matter, as follows: generating energy profiles for a specific task in a processing device executing multiple tasks and a processing device for multitasking multiple tasks.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 4-6, 14-19, 7, 10-12, and 20-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- European Patent Application No. 0 794 481 A2 by Gouzu et al, hereinafter Gouzu discloses a mobile communications device or portable telephone (page 2, lines 7-11) comprising: circuitry for receiving a first task identifier indicative of an active task in a processing component (Figure 4, 3: Task Request Means; page 4, lines 7-8; page 8, line 19); a memory in the comparator for storing a second task identifier indicating a task to be monitored (Figure 4, 6: Task Managing Means; page 8, lines 20-22; Figure 5, S213); a comparator for comparing the first and second task identifiers and generating a predetermined signal if the first and second task identifiers match (Figure 4, 6; page 8, line 23); circuitry for measuring activity of certain devices responsive to said predetermined signal (Figure 4, 202: Power Consumption Calculating Means; page 8, lines 24-46)
